A HISTORY OF THE FINEST TURF GRASS

JW Turf Farms has been a staple in southeast since 1987. Encompassing 1,600 acres, we produce eight top quality, warm-season turfgrass varieties. Our grasses are selected for their improved appearance and functionality in a variety of different landscapes. Over the years, we have provided turfgrass for golf courses, sports complexes, polo fields, commercial projects and for Florida homeowners. Our turfgrass quality and our customer service are second to none.

OUR HISTORY

- From its humble beginnings in southeast Florida, JW Turf Farms has been producing and distributing premium products across the Sunshine State. Founded by the Prescott family: Lourdes, Warren Sr., Jessica and Warren Jr., JW Turf Farms began as a row cropping operation in 1987. Beans and Eggplants were the staple crops of the farm, which at the time, spanned 150 acres.
- In 1988, the Prescott's expanded operations to include the cultivation and distribution of improved turfgrasses. The immediate success of turf production was so overwhelming, the Prescott family decided to stop growing row crops and focus on turfgrass. Twenty years later, JW Turf has expanded into a top quality sod harvesting facility, encompassing over 1,600 acres of land.
- JW Turf Farms continues to stay on the cutting edge of technological advancement and environmental preservation. The farm is anchored by agri-farmer, Warren Prescott Sr., a member of the Southern Seed Certification Program and a member of the Florida Sod Growers Cooperative. Under Prescott's leadership, the farm became the original Celebration Bermudagrass stock provider in the United States. Prescott is beginning to diversify, having recently embarked on the venture of organic cattle farming. Over 800 head of cattle now reside on the farm.
- Operated for over 20 years by a certified technical staff, JW Turf Farms produces eight different turfgrass varieties. The farm has provided turfgrass to golf courses, polo and sports fields, residential communities and commercial facilities across the state. JW Turf Farms prides itself on top quality turfgrass with top notch customer service.

It all starts here with fumigation

- Grown on sand based soils
- Treated with Ronstar preemergence before sprigging
- Methylbromide covered with state of the art tarps, left in place for five days

Delivery and installation available from 1,000sf to 1,000,000+ SF

by Ryan Golf.

March 2011 Aerial

Over 46,000 sf of Celebration sod used in 2009. The range was usable in less than a month.

It stands today as a typical example of Celebrations qualities.

- Exceptional recovery
- Durability
- Great color.
- Drought resistance
- Cold Tolerance
- Fine playing surface.

One of many success stories due to a great product and Aone team:

- Mike Ballard & staff
- Ryan Golf
- JW Turf Farms

Bunker renovation
- **Weston Hills**, Architect Kipp Schulties
Bunker renovation

High Ridge is possibly one of Kipp Schulties finest projects. The topography and vegetation were a great canvas to start with and the membership were willing to fund a high profile golf course.

JW Turf Farms did all the sprigging , hand planting and sodding with **Celebration**.

Steve Kuhn did a remarkable job with the growin especially with the MiniVerde.

JW's experienced crews laid over 1,000,000 sf of sod. Greens and bunker surrounds that calls for precision work

Total renovation of the twenty six year old Legends Course.

Jason Bagwell, GSC, oversaw the construction, growin and is now maintaining the course.

The construction was featured on TV by *Golf Course Operations*.
